PROCEDURES FOR DISPOSING OF FAT, OIL AND GREASE (FOG) MATERIALS AT THE WEST HAWAII'Ī SANITARY LANDFILL

71-1111 Queen Ka'ahumanu Highway
Kailua-Kona, Hawai'i

*Revised: July 1, 2018

- Establish an account with the Solid Waste Division (SWD) by calling (808) 961-8270.
 - This is not applicable if you are using an existing account or are an established hauler with a current and valid account with the Solid Waste Division.
- Call the County's landfill operator, Waste Management Hawai'i (WMH), at 886-0940 or visit <http://www.wmsolutions.com> for instructions on how to do a Waste Profile, and make an appointment for disposal. You will need to provide an estimated volume (in gallons).
 - If your FOG is from a septic system, call the SWD for additional information and instruction.
 - Only FOG is accepted for solidification - process water must be separated from the FOG prior to disposal.
- Due to the additional steps needed to dispose of your FOG, it is critical that you show up on the scheduled date and time.
- If you show up at the WHSL without an appointment, you will not be able to dispose of your FOG.

On the day of your appointment, you will need to weigh in at the County Scale.

- After scaling, you will be directed to the Solidification Pit.
- You are responsible for emptying your container(s).
- Container(s) cannot be disposed of in the Solidification Pit.
- You must bring sufficient help to empty your container(s).

After disposing your FOG, you must return to the Scale to be weighed out.

- Your disposal fee will be based on the net weight multiplied by \$108 per ton, or a fraction thereof.
 - The scale is set up to weigh in increments of .01 ton. For example, if your net weight is 2,020 pounds, you will be charged \$109.08 (1.01 x \$108).
- In addition to the per ton fee, a special handling fee of \$108 per load will be added to the invoice.

The following are not allowed as FOG

- Any type of petroleum based oil (used motor oil, hydraulic oil, brake fluid, gear oil, etc.)
- Coolants, refrigerants, lubricants, etc.
- Paint, thinners, stains, solvents, cleaners.
- Process water.

*All other editions are obsolete
